

REMARKS

INTRODUCTION

In accordance with the foregoing, claim 1 has been amended. Claims 22-35 have been added. Claims 1-35 are pending and under consideration.

CLAIM REJECTIONS

Claims 1 and 2 were rejected under 35 U.S.C. §102(b) as being anticipated by Korean Patent No. 20-0253576 (hereinafter "the Korean patent").

Amended claim 1 recites: "...a rotation control unit to be moveably connected to the base hinge and to prevent and allow a rotation of the stand member relative to the base member." Support for this amendment may be found in at least Figure 3 of the present application. In contrast to claim 1, the Korean patent does not discuss a rotation control unit moveably connected to the base hinge. As noted in the Office Action, the Korean patent would have means of limiting the pivoting range. However, as is apparent from the figures, the pivoting means do not include a rotation control unit to prevent and allow rotation of, or rather the function of locking and unlocking a rotation of, the stand member as is recited in claim 1. Further, the Korean patent does not discuss or show a control unit moveably connected to the base hinge, or the second hinge 7 of the Korean patent.

Claim 2 depends on claim 1 and is therefore believed to be allowable for at least the foregoing reason.

Withdrawal of the foregoing rejection is requested.

ALLOWABLE SUBJECT MATTER

The Applicant acknowledges with appreciation that claims 3-21 have been found to contain allowable subject matter. In view of the foregoing, it is respectfully submitted that claims 3-21 are allowable in their present form.

NEW CLAIMS

Claims 22-35 have been added to present an alternate recitation of the present invention. No new matter has been added. It is respectfully submitted that claims 22-35 patentably distinguish over the cited prior art. For example, claim 22 recites, in part, a rotation

control unit to be moveably connected to the base hinge by pushing thereon and to prevent and allow a rotation of the stand member relative to the base member.

CONCLUSION

There being no further outstanding objections or rejections, it is submitted that the application is in condition for allowance. An early action to that effect is courteously solicited.

Finally, if there are any formal matters remaining after this response, the Examiner is requested to telephone the undersigned to attend to these matters.

If there are any additional fees associated with filing of this Amendment, please charge the same to our Deposit Account No. 19-3935.

Respectfully submitted,

STAAS & HALSEY LLP
